Enabling International Language Support in Windows XP/Server 2000/2003 Family

With multiple languages and keyboards/Input Method Editors (IMEs) installed on your computer, you can compose documents that contain more than one language. Any recipients of multilingual documents must also have the same languages installed on their computers to read or edit the documents.

Download and Install Indic IME:

It may be downloaded from http://rajassembly.nic.in or http://www.BhashaIndia.com/Download/IME/Hindi_IME_Setup.zip website for Hindi Indic IME 1 keyboard layout installation. Unzip and Install by double clicking setup file.

Add Language Support:

- To perform this procedure, you must be a member of the Administrators group on the local computer, or you must have been delegated the appropriate authority. If the computer is joined to a domain, members of the Domain Admins group might be able to perform this procedure.
- The below illustrations are from **Windows XP**. The steps for Windows Server 2000/2003 are almost identical.
- 1. Go to Control Panel.

P Control Panel			Converted 💷 🗵 🗵

 6. Under Supplemental language support, select the check box beside the applicable language collection: Install files for complex script and right-to-left languages (including Thai)

Regional and Language Options
Regional Options Languages Advanced
Text services and input languages To view or change the languages and methods you can use to enter text, click Details.
C Supplemental language support
Most languages are installed by default. To install additional languages, select the appropriate check box below.
Install files for complex script and right-to-left languages (including Thai)
Install files for East Asian languages

The complex script and right-to-left languages include **Unicode Indic languages**. The files for most other languages are installed on your computer automatically by Windows.

7. Click OK or Apply.

You will prompt to insert the Windows CD-ROM or point to a network location where the files are located. After the files are installed, you must restart your computer.

To remove the language files, clear the check box beside the applicable collection, and then click OK or Apply.

Add Keyboard/Input Method Editor:

- 1. Follow steps 1 5 from <u>"Add Language Support"</u> above.
- 2. Under "Text services and input languages," click on the "Details..." button.
